### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with William Schrot on February 2, 2005.

The application has been amended as follows:

IN THE CLAIMS:

In claim 1, line 10, "located" has been changed to -- effective --.

### ***Allowable Subject Matter***

2. The following is an examiner's statement of reasons for allowance: the prior art of record does not teach nor fairly suggest a filler neck device having a filler neck and a closure cap as claimed wherein a locking device is "effective at a region of transition from the axial path to the circumferential path, said locking device increasing: the resistance to movement of the closure cap when said engagement elements are within said region of transition when bringing said closure cap with respect to said filler neck from either the initial position into the final position or the final position into the initial position". The prior art of record does not provide this functional limitation as set forth in the instant claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
